PROFILE

I am a web developer specialising in frontend development, with a strong passion for building fluid, responsive, and user-friendly web experiences. Skilled in translating design files (such as .psd) into clean, functional code, I pay close attention to detail and design integrity. I bring a curious and growth-oriented mindset to every project and am eager to collaborate with diverse teams across the globe.

I look forward to contributing meaningfully and growing as a valuable member of any team I join.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, HTML5, CSS, React.js, Vue.js

Tools & Technologies: Tailwind CSS, Git, JSON Server, FetchAPI

PROFESSIONAL EXPERIENCE

Worked on redesigning a website for Dial247 Security **{2023}**

PROJECTS BUILT

- Gallery by Ade – A clean, responsive grid-based gallery showcasing visual layouts and minimal UI design.
<https://gallerybyade.vercel.app>
- Foodspring by Ade – A vibrant landing page concept for a food and organic produce brand with a strong layout and responsive design.

<https://foodspringbyade.vercel.app>

- Auspices – A dark-themed, minimal brand concept page exploring typography, spacing, and visual storytelling.

<https://auspices.vercel.app>

- Vue.js To-Do App – A full CRUD to-do list application using Vue.js and JSON Server for persistent backend simulation.
- For more projects, including interactive games, UI challenges, and full CRUD apps, visit my portfolio: [AdeDevs](#)
